

# Specialist in Calibration Testing. Who is He?

**Yu.A. Baryshev**<sup>1</sup>, FSAEI FVT Academy for Standardization, Metrology and Certification (Educational), Assoc. Prof. Dr.,  
elizm@asms.ru

<sup>1</sup> Head of Electrical Measurements Department, Moscow, Russia

**Citation:** Baryshev Yu.A. Specialist in Calibration Testing. Who is He? *Kompetentnost' / Competency (Russia)*, 2019. no. 4, pp. 26–28

## key words

profession, specialty, specialization,  
verification, verification officer,  
measurement, education,  
qualification

I considered the approach to the calibration testing verification officer's professional standard formation from the term “specialist”. I believe that modern organization of labor activity; historically established division of labor presupposes a clear distinction between professions, the presence of certain requirements for experience, education, knowledge, qualifications, as well as a certificate of job seeker. In my opinion, when developing a professional standard of a calibration testing verification officer, its authors need to take into account the existing division of labor when distinguishing generalized labor functions. The source of information on the existing labor division can be normative documents, experts and managers experience. Such profession as “calibration testing verification officer” should appear with the introduction of this regulatory document. Only then, it will be included in the official reference book of professions.
