## key words

risks, politics, region, economic ties, globalization, sanctions

The development and formation of foreign economic relations is due to the division of labor in the context of society or territory. Of course, such a division should be considered on an international scale. The general situation in the world, political trends in countries and in the world – from all this there is a kind of codependency with the international division of labor. The article is devoted to the study of the concept of country risk, the main methods of country risk management are considered. The influence of country risks on the economic ties of the regions is revealed, measures are proposed to minimize the impact of country risk and strengthen the financial and economic stability of the regions.
