key words

classification, accommodation services, accommodation facilities, draft law, accreditation

In light of the ever-increasing interest in traveling in Russia, special attention is now being focused on improving the quality of services provided by accommodation enterprises. Recently, the regulation of the hotel business in Russia has undergone many significant adjustments within the framework of the regulatory framework. The article we have analyzed the trends in the classification of accommodation enterprises in accordance with the amendments to the current Regulation on the hotels' classification. There is a certain tendency to increase the requirements for hotels in terms of the classification process and reduce the responsibility of accredited organizations that carry out this procedure. This fact, we think, will lead to a situation where the quality of hotel service may deteriorate, and, in turn, may lead to a weakening of the confidence of both domestic and foreign tourists in the hotel business in Russia.

Газовые хроматографы

Конспект лекций. — М.: АСМС, 2025

Приведена классификация методов, последовательно рассмотрен механизм хроматографического разделения, а также методы градуирования и поверки хроматографов. Описана схема газового хроматографа, основные характеристики элементов этих хроматографов: газа-носителя, дозаторов, хроматографических колонок, термостатов, детекторов. Даются понятия качественного и количественного хроматографического анализа, рассматриваются особенности нормирования метрологических характеристик.

Конспект лекций соответствует учебной программе специализации «Поверка и калибровка средств физико-химических измерений». Предназначен для слушателей АСМС, повышающих квалификацию на кафедре «Теплотехнические измерения».
