key words

quality assurance, risks, network participants, network structure, resources

The network organizational form is fixed at the legislative level to improve the quality of educational programs in the preparation of students. For this purpose, special unique resources of each participant are used in the educational process. The advantage of network forms in any field of activity is the mutual strengthening of the potential of all participants in the process. In the study the risks and areas of quality assurance in the implementation of experimental design work (R&D) in a network form are identified. The experience of practical implementation of quality assurance of R&D performance in network interaction of a university with mechanical engineering enterprises is presented.

Self-management и психология влияния

Учебное пособие. — М.: АСМС, 2022

Описываются общие принципы и закономерности взаимодействия, объясняется психология влияния в ситуациях делового взаимодействия, подробно рассматриваются ситуации, разрешить которые можно только с помощью влияния собственной личности, говорится о самомотивации, time-management и управлении эмоциональным состоянием.

Как известно, self-management, или самоуправление, — это процесс управления собой для достижения собственных целей, который позволяет оптимально использовать собственные возможности, сознательно управлять событиями, способствует формированию самодостаточной, гармонично развивающейся личности.
