cost reduction technologies, costs, legislation

Yearly, competition between enterprises of different sizes is growing, both on the world market and in Russia. Therefore, enterprises resort to various cost-cutting technologies, such as outsourcing and outstaffing. We justify the relevance of the issue under consideration, give a general idea about outsourcing and outstaffing, about the advantages and disadvantages of each of the methods of cost reduction.

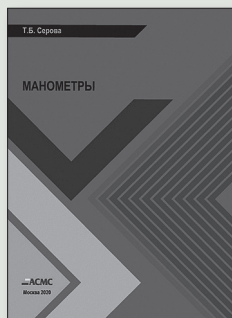

The directions of development of outsourcing and outstaffing in the territory of Russia and the problems arising on the way of their development are considered. In accordance with the specifics of the development of these areas, we have developed recommendations for improving the system of regulation of outsourcing and outstaffing.
