key words

state tasks, management, systemic approach

Over the past years, our economy and social sphere have been burdened not only by the ideological vices of the economic policy of the reformers. The poor quality of management of large-scale state tasks (programs, projects) brought enormous harm to the country. Evidence of this is the many years of misuse and inefficient use of funds spent on all sorts of expensive initiatives. A specific example is the failure of innovative development and, as a result, the technological backwardness and non-competitiveness of our products. The country suffered huge losses. We are talking about the loss of tens of trillions of rubles.

The organization of interaction between people, economic entities and government bodies to solve state social and economic problems is characterized by the need to take into account a large number of interdependent factors and conditions. These are links in the same chain. Lack of accounting or poor performance of at least one of them leads to a decrease in the efficiency of solving the problem.

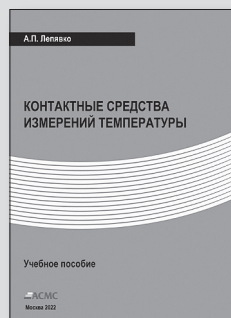

I have considered two interrelated problems: a systematic approach to managing large-scale government tasks and the quality of their solution. They are not only interconnected, but also interdependent. Quality is always a complex of technical, economic, social and organizational requirements. Without a systematic approach to management, it is impossible to create something of high quality in principle.

Контактные средства измерений температуры

Учебное пособие. — М.: АСМС, 2022

В учебном пособии приведено понятие «температура», описаны температурные шкалы, дана классификация контактных средств измерений температуры.

Для каждой из групп контактных средств измерений: механических, или термометров расширения (манометрических, биметаллических, жидкостных стеклянных), и электрических (термопреобразователей сопротивления и термоэлектрических преобразователей) рассмотрены принцип действия, конструкция, метрологические характеристики и методы поверки.

По вопросам приобретения обращайтесь по адресу: Академия стандартизации, метрологии и сертификации (АСМС), 109443, Москва, Волгоградский пр-т, 90, корп. 1. Тел. / факс: 8 (499) 742 4643. Факс: 8 (499) 742 5241. E-mail: info@asms.ru
