key words

pharmaceutical structure,
pharmaceutical safety, medical
products, unified technical policy

The history of the pharmacy business development is examined. It is estimated that in Russia it was strictly regulated and manageable. In modern Russia in the absence of relevant technical ministries and interdepartmental cooperation, the proposed palliative, using the example of JSC ECOLab enterprise, which has been successfully operating in the Moscow Region for more than 30 years, for the development and production of medical devices, medicines, and biologically active additives, supported by other similar organizations, will be able to significantly accelerate the process of reviving production pharmacies and the entire pharmaceutical structure as a whole, aimed at meeting the individual needs of non-standard medicines of citizens of the Russian Federation.
