key words

anti-corruption management system, corruption risks, corporate culture, international practice, standards

Adoption of various national laws, as well as international agreements, is not sufficient for solution problems connected with bribes, bribes and other types of offenses in respect of obtaining illegal benefit by both certain employees, interested persons, and companies in general.

Today, the need for responsibility of the concrete enterprises for corruption risks prevention increases in the Russian Federation, as well as in any other country of the world. It is possible to reach it only by application of the effective anti-corruption management systems build on risk-focused approach within the Russian, interstate and international legislation. The top management of the companies has to promote in every possible way the formation of transparent and honest corporate culture which is a key factor of success in the fight against corruption.
